

GreenArc 300 Bilge

CLEAN BILGE WATER

By pumping the bilge water into the GreenArc 300 Bilge pre separator, you separate the oil and dirt from the bilge water, so there is no visible oil in the bilge water.

STOP OWS PROBLEMS

Because the bilge tank is too dirty, the OWS has daily operational problems. By using the pre-separator, GreenArc 300, you will avoid the daily OWS problems.

SUSTAINABILITY

GreenArc complies with UN's Sustainable Development goals no 9, 12, 13 and 14.

This model prevents ships smaller than 400 GT to pump oily water over board.

FACTS

- GreenArc has no filters
- GreenArc has only two moving parts
- GreenArc requires no monthly crew maintenance
- Low energy consumption
- Reduces fire hazard in engine room
- No oil smell in engine room
- 300 litres a hour pumping capacity

WHAT OTHERS SAY

- "Very low maintenance costs"
- "Can run dry for hours"
- "Very easy to use"
- "The system is very reliable"
- "Can now pump water overboard"
