

GreenArc 500 Sludge

SAVE MONEY

With GreenArc the sludge tank only contains sludge, and not a lot of water. This makes the volume taken on land much less, and therefore saves the ship owner a lot of money.

EFFECTIVE INCINERATOR BURNING

You will NEVER have to evaporate water from sludge before burning again. GreenArc manages this task 24/7, and removes all visible water from sludge. Saves a lot of fuel and manhours.

SUSTAINABILITY

GreenArc complies with UN's Sustainable Development goals no 9, 12, 13 and 14.

GreenArc has been approved as a sludge reduction by Dnv-Gl.

FACTS

- Reduces CO2 by 50%, with less transport
- GreenArc has only two moving parts
- GreenArc requires no monthly crew maintenance
- Low energy consumption
- Dnv-Gl approved as Sludge Reduction
- GreenArc has no filters
- 500 litres an hour pump capacity

WHAT OTHERS SAY

- "The system is very reliable"
- "Very low maintenance costs"
- "Very easy to use"
- "Can now pump water overboard"
- "Can run dry for hours"
